Container Dimensions	Metric	Lid Dimensions	Metric
Height	75mm	Height	7mm
Width	158mm	Width	221mm
Length	221mm	Length	158mm
Wall Thickness	0.8mm	Wall Thickness	0.9mm
Weight	63.5g	Weight	36.5g
Volume	2000ml		
Volume To Brim	2200ml		

Raw Material / Transport and Warehousing

Buckets and lids are made from food-grade polypropylene (PP).

Warehousing: sealed unit pallets, which include even numbers of bases and lids.

Filling and closing conditions: max. content temperature during filling 95°C. For stacking content temperature should be lower than 45°C. Put not more than 2 warm containers in the stack.

When outside temperature decreases to 25-30° containers will be more rigid and mechanical parameters allowing stacking for maximal static load as below.

Load on the lower container:
Static (T<23°C) : < 9 kg
Transparent containers < 7 kg

Palletizing of containers: product with density 1,6 g/cm³ according to the customer practice giving consideration to the mentioned earlier values.

All materials and dyes used to produce container or lid designed for the food sector are approved for food contact.

All packages from a single pallet should be used immediately after unpacking.

Manufacturer is not responsible for container deformation if stacked with other products on top of finished pallet.

Pelletisation at delivery

2400 container/pallet
packaging: carton box

7200 lid/pallet
packaging: carton box

Container Colours

Colour and IML options available
(minimum orders apply).

Lid Colours

Colour and IML options available
(minimum orders apply).
