Dimensions	Metric
Upper Diameter (inside)	122,4mm
Upper Diameter (with flange)	132mm
Upper Diameter (with handles)	135mm
Bottom Diameter (external)	105,4mm
Height (with standard lid)	131mm
Height (with lid for foiling)	-
Nominal Capacity	1000ml
Total Capacity	1285ml
Total Usable Capacity	1200ml

Container weight with handle	37g
Handle weight (strap)	-
Handle weight (PP)	-
Handle weight (metal)	-
Lid weight	9-10g
Weight tolerance	+/- 5%
Dimension tolerance	+/- 1mm

Raw Material / Transport and Warehousing

Buckets and lids are made from food-grade polypropylene (PP).

Warehousing: sealed unit pallets, which include even numbers of bases and lids.

Filling and closing conditions: max. content temperature during filling 95°C. For stacking content temperature should be lower than 45°C. Put not more than 2 warm containers in the stack.

When outside temperature decreases to 25-30° containers will be more rigid and mechanical parameters allowing stacking for maximal static load as below.

Load on the lower container:
Static (T<23°C) : < 9 kg
Transparent containers < 7 kg

Palletizing of containers: product with density 1,6 g/cm³ according to the customer practice giving consideration to the mentioned earlier values.

All materials and dyes used to produce container or lid designed for the food sector are approved for food contact.

All packages from a single pallet should be used immediately after unpacking.

Manufacturer is not responsible for container deformation if stacked with other products on top of finished pallet.

Pelletisation at delivery

4200 units/pallet
packaging: carton box

Standard Colours

Colour and IML options available (minimum orders apply).
